**July 10, 2020**

**Dear Residents, Families and Caregivers,**

I hope this finds you well and in good health. As the COVID-19 pandemic has slowed, we are looking forward to reopening. However, there is quite a bit of work ahead of us before we can relax the current restrictions in place and open our doors to visitation. As we have transitioned into the “Green Phase” designation, we want to provide updates of our initiatives and facility happenings.

Centers of Medicare and Medicaid Services (CMS) requires the data below to be provided weekly to the National Healthcare Safety Network (NHSN).

Resident Impact (May 8, 2020 thru July 9, 2020)

Number of cases	
3	ADMISSIONS: Residents <b>admitted</b> or readmitted who were previously hospitalized and treated for COVID-19
0	CONFIRMED: Residents with new laboratory positive COVID-19
0	SUSPECTED: Residents with new suspected COVID-19
0	TOTAL DEATHS: Residents who died in the facility or another location
0	COVID-19 DEATHS: Residents with suspected or laboratory positive COVID-19 who died in the facility or another location.

Under the “Green Phase” designation senior living providers are still under the same visitation restrictions and modified community operations as we previously outlined. There are a number of factors that come into play for us to move past these restrictions and return to inside visitation and normalized operations.

Once a County has moved into the “Green Phase,” a minimum of 28 days must pass from entering this phase and also assume the following conditions are met:

- No active or new Covid-19 cases within the last 28 days
- The facility is not experiencing staff shortages
- The facility has adequate supplies of personal protective equipment and essential cleaning and disinfection supplies to care for residents
- The facility has adequate access to testing for COVID-19
- Referral hospital(s) have bed capacity on wards and intensive care units

Currently, new admissions/re-admissions are being tested prior to transfer into the facility. All of our resident and current associates baseline testing was completed with NO positive results. All new employees will be required to have a Covid 19 test as well.

We are in the process of completing an outdoor visiting area to be in place by the end of next week. Families will schedule a time to visit their loved one in this area by calling the facility. A screening will be completed prior to your entry to the area and masks are mandatory for the visit. We will clean and sanitize the area between visits, with a limit of 30-minute visits.

A large part of our strategic preparation is staffing contingency plans and breaking the facility into different zones for positive (Red zone 100 Unit), presumed positive or exposed (Yellow Zone 200 Unit), and negative results (Green zone 300 and 400 Units).

We continue to report our data to a number of sources on a daily and weekly basis. This data is now publically published by the Pennsylvania Department of Health on a routine basis.

In closing, I hope all of you and your families are well and healthy. We will get through these challenging times together and be stronger in the end!

If you have any questions, please feel free to contact me at, 724-465-3900 or Kimberly\_cobaugh@indianhaven.com.
